DOCUMENT N°. 5: TECHNICAL SPECIFICATIONS

The TS constitute the basis of verification of the conformity of the supplies and their evaluation. Consequently, well defined TS ease the preparation of conforming bids by bidders as well as the preliminary examination, evaluation and comparison of bids by the Evaluation Sub-committee.

- The TS require that all supplies as well as the materials that make them up be new, unused, be the recent or current model and that they include all the improvements in issues of conception and materials, except the contract stipulates otherwise.
 - The TS take into account practices considered as being the best by experience. The use of specifications prepared in the same country and applied to the same sector may constitute a safe base to prepare the TS.
 - The use of the metric system is highly recommended.
 - The standardization of TS may have advantages and depends on the complexity of the supplies and the repetitive nature of the award of contracts under consideration. The TS must be sufficiently general to avoid creating difficulties in use by the laborers of the materials, equipment generally used in the manufacture of similar supplies.
 - The standards in terms of equipment, materials and labour specified in the tender documents should not have an exclusion character. As far as possible, international standards must be used. References to trade marks, catalogue numbers or other details which circumscribe the materials or articles to a particular manufacturer must, as far as possible, be avoided. Where inevitable, such description of an article must always include the inscription "or equivalent in substance".
 - The TS describe in detail the requirements concerning, among others, the following aspects:
 - Standards required concerning materials and manufacturing and production of supplies;
 - Details concerning tests (type and number);
 - Complementary ancillary services necessary to ensure delivery/execution in due form;
 - d) Detailed activities borne by the bidder, possible participation of the buyer in these activities;
 - e) List of functioning guarantees (details) covered by the Guarantee and details concerning the applicable damages in case of the non-respect of this functioning guarantees.
 - TS specify the main technical and functioning characteristics required as well as the other requirements such as the guaranteed maximum or minimum values, as the case may be. If necessary, the Contracting Authority includes an ad hoc formula (document attached to the tender letter) in which the bidder furnishes the detailed information on the acceptable values or guarantees of the functioning guarantees.
- When the Project Owner requires that the bidder furnish in his bid part or all the TS, technical documents or other technical information, the nature and quantity of information requested as well as their presentation in the bid must be specified.

1- SPECIAL TECHNICAL CONDITION FOR SUPPORT
