5. The standards in terms of EQUIPPING, materials and labour specified in the tender documents should not have an exclusion character. As far as possible, international standards must be used. References to trade marks, catalogue numbers or other details which circumscribe the materials or articles to a particular manufacturer must, as far as possible, be avoided. Where inevitable, such description of an article must always include the inscription "or equivalent in substance".
6. The TS describe in detail the requirements concerning, among others, the following aspects:
 - a) Standards required concerning materials and manufacturing and production of supplies;
 - b) Details concerning tests (type and number);
 - c) Complementary ancillary services necessary to ensure delivery/execution in due form;
 - d) Detailed activities borne by the bidder, possible participation of the buyer in these activities;
 - e) List of functioning guarantees (details) covered by the Guarantee and details concerning the applicable damages in case of the non-respect of this functioning guarantees.
7. TS specify the main technical and functioning characteristics required as well as the other requirements such as the guaranteed maximum or minimum values, as the case may be. If necessary, the Contracting Authority includes an ad hoc formula (document attached to the tender letter) in which the bidder furnishes the detailed information on the acceptable values or guarantees of the functioning guarantees.

When the Project Owner requires that the bidder furnish in his bid part or all the TS, technical documents or other technical information, the nature and quantity of information requested as well as their presentation in the bid must be specified.
