# 3. PARTICIPATION AND ORIGIN OF BIDDERS:

Participation in this invitation to tender is open to all registered and qualified companies or groups of companies based in the Republic of Cameroon.

#### 4. ESTIMATED COST:

The previewed cost of the entire work of this procedure is 130,000,000 FCFA (one hundred and executed in one phase as follows: the cost of Phase Million FCFA) to be executed in 2025,

#### 5. FUNDING:

The Works on this tender are funded by the Public Investment Budget of the Ministry of Public Works (PIB MINTP 2025 Excise), for the 2025 financial year.

ISION NORTH

#### 6. PERIOD OF EXECUTION:

The entire period for execution of these Works is 5 months (*five months*) calendar months. This duration starts as of the date of notification of the service order to start the Works.

# 7. ADMINISTRATION CHARGED WITH THE SIGNING OF THE CONTRACT

After examination for the tender documents of the various bidders, and the choice of the successful bidder by the contracting authority, the contract will be signed between the latter and the contracting authority, who is the Senior Divisional Officer for Momo Division (S.D.O.)

#### 8. TEMPORAL BID BOND (TENDER GUARANTEE):

#### 9.

The bids should be accompanied by a temporal bid bond (Bank Tender Guarantee, or a bank cheque certified), established as per the indicated Model in this tender file, by a financial institution accredited by the Ministry of Finance, and of an Amount equal to:

Lot Number

Amount of the bid Bond in cfa F
(Tender guarantee)

LOT N°1

2,600,000 FCFA

To avoid being rejected, the original copy of the bid bond (Bank tender guarantee) should be produced dating less than 3 (three) months.

The temporal bid bond shall automatically be liberated within 30 (thirty days) days upon expiration of the validity of the bids for the unsuccessful bidders. In case where the bidder is awarded the contract, the temporal bid bond is liberated after the production of the final bond.

#### 10. CONSULTATION OF TENDER FILE:

The tender file can be consulted in the office of the contracting authority, at the Divisional Office Mbengwi

#### 11. ACQUISITION OF THE TENDER FILE:

The tender file can be obtained in the office of the contracting authority, precisely in the office of the senior divisional office, on presentation of a payment receipt to the public treasury, of a non-refundable purchase fee for the tender file. 108,000 (one hundred and eight thousand francs cfa) Francs CFA.

This receipt should identify the buyer as the representative of the bidder, wishing to participate in the consultation.

#### 12. PRESENTATION OF THE BIDS

The bid documents will be presented in three envelopes as illustrated below:

The Envelope A containing administrative documents (volume 1);

The Envelope B containing technical documents (Volume 2);

The Envelope C containing financial documents (Volume 3),

All constituted documents (Envelopes A, B and C), will be put in a bigger sealed envelope bearing only the title of the Open national invitation to tender N°001.

The various documents in each bid will be numbered in the order of the tender file and with separators of different colors other than white.

#### 13. SUBMISSION OF BIDS:

Each bid, prepared in English or French in (07) seven copies, that is (01) one original and (06) six copies noted as such, shall be forwarded to the contracting authority, notably to the Office of the Senior Divisional officer latest the: 16/05/2025 at 10.00am local time bearing

# OPEN NATIONAL INVITATION TO TENDER, EMERGENCY PROCEDURE N°.02/ONIT/NW06/DTB/2025 OF 24/04/2025

FOR THE CONSTRUCTION/RECONSTRUCTION OF A COLLAPSED STRUCTURE IN MOMO DIVISION. (CONSTRUCTION OF MAIN BRIDGE IN ANDEK TOWN OF 18M SPAN OVER RIVER FEG IN NGIE SUBDIVISION) NORTH WEST REGION

To be opened only during the bid-opening session ».

#### 14. ACCEPTABILITY OF BIDS:

Bids that will be submitted after the date and time mentioned above or those that will not respect the separation model indicated in the different documents in each bid shall not be accepted.

To avoid being rejected, the required administrative documents will be imperatively produced in original or in certified true copies by the issuing service, in conformity with the stipulation rules and regulations of this tender.

These Administrative documents have a validity period of (03) three months. This validity period has to begin after the date of the launching of the tender.

#### 15. OPENING OF BIDS:

The opening of bids shall take place on the 16/05/2025 at 11:00am, in the conference hall of the Senior Divisional's Office, at the senior divisional office Mbengwi premises.

The opening of bids will be done at once and in three stages:

- Stage 1: Opening of envelope A containing administrative document (volume 1),
- Stage 2: Opening of envelope B containing technical document (volume 2)
- Stage 3: Opening envelope C containing financial document (volume 3).

All the bidders can take part in this opening session or can be represented by one dully mandated person (even in case of joint venture) who has a perfect mastery of the tender file.

#### 16. MAIN CRITERIA OF EVALUATION OF THE BIDS:

#### 16-1-: ELIMINATORY CRITERIA:

- a) Absence bid bond in the administrative file;
- b) No purchase receipt from public Tresury
- c) No reference  $\geq 104,000,000$  frs in this domian (80%)

### General Regulations of the invitation to tender A. General

#### Article 1: Scope of offer

The Senior Divisional Officer Momo (S.D.O), contracting authority, launches on behalf of the Republic of Cameroon, an open national invitation to tender for the Construction/Reconstruction of a Collapsed Structure in Momo Division. (Construction Of Main Bridge in Andek Town Of 18m Span Over River Feg in Ngie Subdivision) North West Region

The bidders retained, must complete the works within the required period as indicated in the specific rules of the tender document (SRTD), except there is a contrary stipulation in the special administrative document, that starts from the date of notification of the service order to start works or of that indicated in the service order.

The word « Day » in this tender document, signifies a calendar day.

#### **Article 2: Financing**

The source of funding of works in this tender document has been indicated in the (SRTD).

# Article 3: Fraud and corruption

- The Contracting Authority requires of bidders and their contractors the strict respect of rules of professional ethics during the award and execution of public contracts. By virtue of this principle, the Contracting Authority:
  - a) defines, within the context of this clause, the following expressions in the following manner:
    - Shall be guilty of "corruption" whoever offers, gives, requests or accepts any advantage in view of influencing the action of a public official during the award or execution of a contract;
    - is involved in "fraudulent manoeuvres" whoever deforms or distorts facts in order ii. to influence the award or execution of a contract;
    - "Collusive practices" mean any form of agreement between two or among several iii. bidders (whether the Contracting Authority is aware or not) aimed at artificially maintaining the prices of offers at levels not corresponding with those which will result from the forces of competition; iv.
    - "Coercive practices" mean any form of harm against persons or their property or threats against them in order to influence their action during the award or execution
    - Conflict of interest shall mean any situation in which the financial or personal interest of an agent or public entity is likely to compromise transparency in the award of public contracts.
  - b. The Contracting Authority shall reject any award proposal if it determines that the proposed successful bidder is directly or through the intermediary of an agent, guilty of corruption or is involved in fraudulent manoeuvres, collusive or coercive practices in the award of this
- 3.2 The Minister Delegate at the Presidency of the Republic in charge of Public Contracts may, as a temporary measure, take a decision to ban bidding for a period not exceeding two (2) years against any bidder guilty of influence peddling, conflict of interest, insider information, fraud, corruption, or production of non-authentic documents in his offer, without prejudice to legal action that may be taken against him.

# Article 4: Candidates allowed to compete

- 4.1 If the invitation to tender is restricted, consultation is addressed to all candidates retained after a pre-
- 4.2 Generally, the invitation to tender is addressed to all suppliers, subject to the following provisions:
  - (a) a bidder (including all members of a group of enterprises and all sub-contractors to the bidder) must be from an eligible country, in accordance with the funding agreement.
  - (b)a bidder (including all members of a group of enterprises and all sub-contractors to the bidder) must not be in a situation of conflict of interest.

- A bidder shall be judged to be in a situation of conflict of interest if he:
- i) is or was associated in the past in an enterprise (or a subsidiary of this enterprise) which provided consultancy services for the conception, preparation of specifications and other documents used within the scope of contracts awarded for this invitation to tender; or
- presents more than one bid within the context of this invitation to tender, except ii) authorised variants according to article 17, where need be; meanwhile, this does not prevent the participation of sub-contractors in more than one bid.
- iii) The project owner is not a shareholder of any bidder so as to compromise the processof
- (c) The bidder must not have been excluded from bidding for public contracts.
- (d) A Cameroonian public enterprise may participate in the consultation if it can demonstrate that it is (i) legally and financially autonomous, (ii) managed according to commercial laws and (iii) not under the direct or indirect supervisory authority of the Contracting Authority.

# Article 5: Supplies and ancillary services meeting the criteria of origin

- 5.1 All supplies and ancillary services forming the subject of this contract must come from countries meeting the criteria of origin defined in the Special Regulations of the invitation to tender.
  - 5.2 Within the meaning of the clause 5.1, the term "supplies" shall refer to products, raw materials, machines, equipment and industrial installations; and the term "ancillary services" shall notably refer to services such as insurance, installation, training and initial maintenance.
  - 5.3 The term "originate" shall qualify the country where the supplies are extracted, cultivated, produced, manufactured or transformed; or the country where a manufacturing, transformation or assembly of components process results in the obtention of a commercial article whose basic characteristics are substantially different from those of its components.

# Article 6: Qualification of bidder

- 6.1 As an integral part of their offer, bidders must:
  - (a) submit a power of attorney making the signatory of the bid bound by the offer; and
  - (b) furnish all the information (to complete or update the information included in the request for pre-qualification which may have changed in the case where the candidates had to pre-qualify) requested from bidders in the Special Regulations, in order to establish their ability to execute the contract; furnish all the information (or update the information included in their request for pre-qualification which may have changed) requested from the bidders in order to establish

Information relating to the following points shall be requested, if need be:

- The production of certified balance sheets and recent turnover; (i)
- access to a credit line or availability of other financial resources; (ii)
- orders acquired and contracts awarded; (iii)
- (iv) pending litigations; and
- availability of indispensable equipment. (v)
- 6.2 Bids presented by two or more associated undertakings (joint-contracting) must satisfy the

- The bids must include all the information listed in article 6(1) above. The Special Regulations must specify the information to be furnished by the group and the information to be furnished by each member of the group;
- b. The offer and the contract must be signed in a way that is binding on all members of the group;
- c. The nature of the group (joint or several) must be specified and justified with the production of a joint venture agreement in due form;
- The member of the group designated as the representative shall represent all the undertakings vis à vis the Contracting Authority in the execution of the contract.
- In case of joint co-contracting, the co-contractors shall share the sums which are paid by the Administration into a single account; on the other hand, each undertaking is paid in its own account by the Administration where it is several co-
- 6.3 Bidders should equally present sufficiently detailed proposals to demonstrate that they conform to the technical specifications and delivery time limits set in the Special Regulations of the
- 6.4 Bidders seeking to benefit from a margin of preference must furnish all the information required to prove that they meet the eligibility criteria described in article 35 of the General Regulations.

# Article 7: Visit of the work site

- 7.1. The bidder is advised to visit and inspect the site of works and its surroundings and to obtain by himself, and under his own responsibility, all the information that may be necessary for the preparation of the tender and the work execution. The costs related to the visit of the site are the
- 7.2. the Contracting Authority is obliged to authorize the Bidder who so requests and his employees or agents to enter his premises and grounds for the purpose of the said visit, but only on the express condition that the Bidder, its employees and agents release the Owner, his employees and agents from any liability that may result and compensate them if necessary, and that he remains responsible for fatal or personal accidents, loss or damage to property, costs and expenses incurred
- 7.3. The Contracting Authority may organize a visit to the site of works at the time of the preparatory meeting for the preparation of the bids mentioned in article 19 of the GRIT.

#### B. Tender File

# Article 8: Content of Tender File

8.1 The Tender File describes the supplies forming the subject of the contract, sets the consultation procedure by suppliers and specifies the terms of the contract. Besides the addenda published in accordance with article 9 of the General Regulations of the invitation to tender, it includes the

Document No.	The tender notice in English and French signed by the Contracting Authority
Document No. 2	The General Regulations of the invitation to tender which has model clauses that are no to be modified;
	The Special Regulations of the invitation to tender containing provisions of documents. No. 2 which should be completed or specified within the context of the invitation to tender concerned.
Document No. 4	The Special Administrative Conditions which deal with the execution of the contract and the related payments;
Document No. 5	The technical specification
Document No. 6	The framework of Unit Price Schedule;

Document No. 7	The framework of bill of Quantities and cost estimates
Document No. 8	Framework of breakdown of unit price;
Document No. 9	Draftcontract;  a. The planning of execution  b. Model form for presentation of equipments, personnel, and references;  c. Model of tender letter;  d. Model of tender bond;  e. Modeloffnalbond;  f. Model of strat up advance;
Document No. 10	Models to be used by bidders;
Document No. 11	Justifications of preliminary studies to be filled by the Project Owner or Delegated Project Owner;
Document No. 12	List of first rate banking establishments and financial bodies approved by the Ministry in charge of finance authorised to issue bonds for public contracts

8.2 The bidder must examine all the rules, forms, conditions and specifications contained in the Tender file. It is up to him to furnish all the information requested and prepare a bid in conformity with all aspects of the said file. Any deficiency may lead to a rejection of his bid.

# Article 9: Clarifications on the Tender File

- 9.1 Any bidder who wants to obtain clarifications on the Tender File may request them from the Contracting Authority in writing or by electronic mail (telecopy or e-mail) at the Contracting Authority's address indicated in the Special Regulations of the invitation to tender. The Contracting Authority shall reply in writing to any request for clarification received at least fourteen (14) days for national invitations to tender and twenty-one (21) days for international invitations prior to the deadline for the submission of the offers.
  - A copy of the Contracting Authority's response, indicating the question posed but not mentioning the author, is addressed to all bidders who bought the Tender File.
  - 9.2 Between the publication of the tender notice including the pre-qualification phase of candidates and the opening of bids, any bidder who feels aggrieved in the public contracts award procedure may lodge a complaint to the Contracting Authority.
  - 9.3 The complaint must be addressed to the Contracting Authority with copies to the body in charge of the regulation of public contracts and the chairperson of the Tenders Board.
  - It must reach the Contracting Authority not later than fourteen (14) days before the opening of bids. 9.4 The Contracting Authority has five (5) days to react. A copy of the reaction shall be forwarded to the body in charge of the regulation of public contracts.

# Article 10: Amendment of the Tender File

- 10.1The Contracting Authority may at any moment prior to the deadline for the submission of offers and for any reason, be it at his initiative or in reply to a request for clarification formulated by a bidder, amend the Tender File by publishing an addendum.
- 10.2 Any published addendum shall be an integral part of the Tender File, in accordance with article 8.1 of the General Regulations of the invitation to tender and must be communicated in writing or made known to all bidders who bought the Tender File. The latter must acknowledge receipt of each of the addenda in writing to the Contracting Authority.
- 10.3 In order to give bidders sufficient time to take account of the addendum in the preparation of their bids, the Contracting Authority may postpone as is necessary, the deadline for the submission of bids, in accordance with provisions of article 23.3 of the General Regulations of the invitation to tender.

21.4.1 Pursuant to the provisions of Article 47 of Decree No. 2018/366 of 20 June 2018 establishing the Public CONTRACT Code, a copy of the provisional and final BILLS will be sent to the Minister for PUBLIC Contracts. Only the final BILL will be subject to the approval of the DIVISIONAL Delegate of Public CONTRACT territorially competent, before its transmission to the Paying Agency.

Article 22: Interest on overdue payments

Any default interest is paid by statement of the sums due in accordance with the provisions of Articles 166 and 167 of Decree No. 2018/366 of 20 June 2018 on the Public CONTRACT Code.

#### Article 23: Penalties for delays

#### 23.1 Penalties for delay of work:

23.1.1 If the other party fails to have completed all the works within the specified time, it will be applied, after prior notice, penalties of delay in accordance with the provisions of Article 168 of Decree No. 2018 / 366 of June 20, 2018 relating to the Public CONTRACT Code:

- 1 / 2000<sup>th</sup> of the total amount of the Contract per calendar day of delay from the first (1<sup>st</sup>) to the thirtieth (30<sup>th</sup>) day.
- $1/1000^{th}$  of the total amount of the Contract per calendar day of delay beyond the thirtieth (30th) day.

In the event of an extension of time by the Employer at the request of the company, except in cases of force majeure, expenses relating to the services of the Control Mission will be borne by the company.

#### 23.2 Penalty for late delivery of contractual documents:

- THE CONTRACTOR representative: 3,000F / day late beyond fifteen (15) days from the date of notification of the start-up service order;
  - Co-contractor's home address: 3,000F / day late beyond fifteen (15) days from the date of notification of the start-up service order;
  - Staff and Equipment List: 5,000F / d over fifteen (15) days from the date of notification of the start-up service order;
  - Insurances: 5000F / day late beyond fifteen (15) days from notification of the Seed Service Order.
  - Final Bond: 5,000F / d over twenty (20) days from notification of the Seed Service Order;
  - Execution Program: 15,000F / d over thirty (30) days from the notification of the start-up service order.

#### 23.3 Penalties for failure to perform:

- No filling of the construction log found during visits: 3 000F / visit
- Unavailability of the site log during visits: 5,000 / visit.
  - 23.4 Cumulative penalties may not exceed ten per cent (10%) of the TTC amount of the contract In accordance with Article 169 of Decree No. 2018/366 of 20 June 2018 on the Public CONTRACT Code.
  - 23.5 A rate greater than ten percent (10%) may result in the termination of the contract In accordance with Article 182 of Decree No. 2018/366 of 20 June 2018 on the Public CONTRACT Code.
  - 23.6 It is the responsibility of the Co-contractor to collect, as and when the works are carried out, the supporting documents of a possible file for the submission of penalties.

- 23.7 The delivery of penalties may be pronounced by the PROJECT OWNER only after 47avourable opinion of the Government CONTRACT Regulatory Agency.
- 23.8 No bonus is provided in case of advance on the contractual period.

# ARTICLE 24 REGULATION IN THE CASE OF A GROUPING

24.1 Direct payments from contractors are envisaged provided that the agent or the contracting party has agreed to the amounts to be paid in this way.

#### **ARTICLE 25 FINAL BILLS**

After completion of the work and within a maximum of 45 days after the date of provisional acceptance, the CONTRACTOR will establish on the basis of conflicting findings, the draft final BILLS of the work actually EXECUTED, which summarizes the total amount of sums he can claim from does the work as a whole.

The final draft bill is presented by the CONTRACTR to the verification of the project manager, the engineer's visa, the Chief of Service's visa and the approval of the contracting authority.

This final draft bill, once accepted or rectified by the CONTRACT MANAGER becomes final settlement. It is used for the establishment of the deposit for balance of the CONTRACT, established under the same conditions as those defined above for the establishment of monthly statements.

# ARTICLE 26 GENERAL AND DEFINITIVE BILLS

26.1 The general and final BILLS at the end of the contract will be signed by the PROJECT OWNER.

26.2 After the acceptance of the works, the Project ENGINEER draws up the general and definitive BILLS of the contract, which is signed by the Contractor on the one hand, the Engineer, the CONTRACTMANAGER and the PROJECT OWNER.

This count includes:

- the final BILL.
- the deposit for balance.
- the summary of the DISCOUNTS.

The amount of the general count is equal to the result of this last recapitulation.

26.2 The signature of the general and definitive BILLS without reservation by the CONTRACTOR, binds the parties definitively and terminates the contract, except with regard to default interest, possibly the revision or discounting of the prices, which are settled by the Member States. Dues, not included in the amount of the contract.

#### **ARTICLE 27: - TAX AND CUSTOMS REGIME**

27.1 This contract is subject, in the field of taxation, to the regulations in force in the Republic of Cameroon.

27.2 This contract is concluded inclusive of all taxes, in accordance with the decree n  $^{\circ}$  2003/651 / PM of April 16<sup>th</sup>, 2003 fixing the modalities of application of the fiscal and customs regime of the public CONTRACTS.

# ARTICLE 28: - Stamp duty and registration of contracts

- 28.1 Seven (7) original copies of this contract shall be stamped and registered by the care and expense of the CONTRACTOR, in accordance with the regulations in force.
- 28.2 After registration, it will be returned to the PROJECT Owner, five (05) original copies for ventilation
- 28.3 Failure to register within the prescribed deadlines will result in penalties provided for by the General Tax Code.

#### Chapter III Execution of services

#### Article 29: Time limit of the contract

29.1 This deadline of this contract shall run from the date of notification of the Administrative Order to start execution and is of \_\_\_\_\_ calendar months

# Article 30: Role and responsibilities of the contractor

- 30.1 The CONTRACTOR acknowledges having read and verified the volume and nature of the work to be EXECUTED. It cannot claim any omission or underestimation of the CONTRACT to make claims of any nature whatsoever.
- 30.2 The contractor shall be held responsible for any damage to the road, residents or vehicles resulting from the use of working methods that do not comply with this contract, in particular the use of fire for weeding of any nature whatsoever is formally prohibited.
- 30.3 The CONTRACTOR is obliged to set up a specific signage for any obstacle created on the day carriage because of the work (temporary deposit of materials before loading). It is strictly forbidden to leave a night obstacle on pavement and paved shoulders, even if reported. Failure to comply with these safety rules will result in penalties as defined in section 14 of this SCC.
- 30.4 The CONTRACTOR must comply with the environmental protection regulations in force in the Republic of Cameroon, and in particular the framework law n  $^{\circ}$  096/12 of 05 August 1996 on the management of the environment and the letter n  $^{\circ}$  00908 / MINTP / DR dated 1997 of the Minister of Public Works publishing the Guidelines for the consideration of environmental impacts in road maintenance. In particular, he must comply with the CPT's requirements in this respect.
- 30.5 The CONTRACTOR may not evade the confirmation decided by the PROJECT OWNER without breaking the market due to his wrongdoing and subjecting himself to the sanctions provided for by the regulations in force.

# ARTICLE 32: - INSURANCE OF WORKS AND CIVIL RESPONSIBILITIES

- 32.1 The CONTRACTOR must prove that he holds a "civil liability" insurance policy, for damages of any kind caused to third parties:
- (a) by his salaried staff working at work;
- (b) by the equipment he uses;
- c) because of the work.
- 32.2 In addition, the site must be covered for all the work of an "all risk building site" insurance issued by a company approved by the competent authority. The costs inherent in this insurance are borne by the CONTRACTOR.

- 32.3 No regulations except the start-up loan shall be made without presentation of a certificate from one company proving that the CONTRACTOR has paid in full the premiums or contributions relating to the works concerned.
- 32.4 The CONTRACTOR shall have a period of fifteen (15) days from the date of notification of the service order to commence work to present a certificate from an insurance company proving that it has been fully paid premiums or contributions relating to the work for this contract. After this period, the contract may be terminated.

#### ARTICLE 33: - CONSISTENCY OF WORK

33.1 The works are defined in the CPT, the price schedule and the estimated detail and generally include:

# SERIE 000: INSTALLATIONS

Site Installation
Bring & Folding of Equipment
Project Launching and sensitization

# SERIE 100: CLEANING AND EARTH MOVEMENTS

Clearing of Vegetation
Ordinary cut and throw
Lateritic fill from borrow pit
Construction of the Platform
Grading/Compaction
Creations of earth ditches and divergents with grader
Wearing Course in Lateritic Gravel
Bulldozing

- 33.2 Services not provided for, due to accidents or whose complexity requires means not defined in the above documents will be performed by the company at the express request of the PROJECT OWNER by order of service. Any service EXECUTED without an order for service will not be paid by the PROJECT OWNER.
- 33.3 Prior to the commencement of all work, the contractor and the Project Manager shall proceed to a measure of the length of the lot and an identification of the work with marking on the roadway every hundred (100) meters. This will be the subject of a report signed by both parties.

#### 33.4 Environmental protection

The CONTRACTOR will be required to comply with the laws governing the protection of the environment in force in the Republic of Cameroon and in particular the law n ° 096/12 of 05 August 1996 on the framework law on the management of the environment and the Letter No. 00908 / MINTP / DR dated 1997 from the Minister of Public Works publishing the Guidelines for the consideration of environmental impacts in road maintenance.

In particular, he must comply with the provisions of the CCTP (chapter V) in this respect.

# ARTICLE 34: - DOCUMENTS TO BE PROVIDED BY THE COCONTRACTOR

#### 34.1 WORK EXECUTION PROGRAMME

34.1.1 Within a period of five (05) days from the notification of the service order to start the work of each pass, the CONTRACTOR will submit to the validation of the CONTRACT Engineer, after approval of the Project Manager, and in six (06) copies a execution PROGRAMME of the works

after a detailed visit of the site, accompanied by the Project Manager. The project manager has two (02) DAYS for the visa or rejection of the project, the CONTRACT Engineer also has three (03) days for validation or rejection. The rejects should focus on the corrections to the execution PROGRAMME to be unique at each level of validation.

#### 34.1.2 This execution PROGRAMME will include:

- The CV of the Site ENGINEER and the copy of his diploma;
- The organization of the company to carry out the work of each workshop;
- The quantitative survey and the location of all the essential tasks to be EXECUTED, so as to obtain a better level of service and good visibility after the works;
- A temporary signage plan for the site during the execution of the work.

#### ARTICLE 35: - ORGANIZATION AND SAFETY OF SITE

#### 35.1 SECURITY OF WORKSITE

#### 35.1.1 Construction Identification Signs

The identification or WORKS announcement signs will be placed at the beginning and at the end of each section, and must be put in place within a maximum of one month after the service order to start the work.

#### 35.1.2 Signalisation of work

- 35.1.2.1 The work SIGNALISATION shall be in accordance with the temporary signalling plan validated in the execution PROGRAMME. It is carried out under the control of the Project Manager by the contractor, the latter having to support the supply and installation of signs and signalling devices, unless otherwise stipulated in the contract.
- 35.1.2.2 The contractor shall be personally liable for all direct or indirect consequences of a lack of signalling or the maintenance of temporary structures necessary for the maintenance of traffic.
- 35.1.2.3 All costs incurred by site-specific road signs are the responsibility of the Contractor. The latter will remain alone and fully responsible for all accidents or damage caused to third parties, during the execution of the work due to his equipment or errors and omissions concerning the signalling.

#### 35.1.3 Night work, holidays and Sundays.

The works cannot continue neither at night, nor on Sundays, nor holidays without the prior written authorization of the CONTRACT Engineer.

#### **ARTICLE 37: - SUBCONTRACTING**

It is not allowed to use subcontracting.

#### Chapter IV: Acceptance

#### Article 41: Provisionnel acceptance

#### **ARTICLE 41: - ACCEPTANCE**

The provisional acceptance of the works will be granted at the end of the execution of these works.

#### 41.1- OPERATIONS PRIOR TO ACCEPTANCE

- 41.1.1 At the end of the works, the CONTRACTOR will make the request in writing to the Project ENGINEER with a copy to the CONTRACT MANAGER.
- 41.1.2 Within a period of seven (07) days from the date of submission of the request for acceptance, a prior visit will be organized by the Project Manager, with the participation of the CONTRACT Engineer, in the presence of the contractor.

This visit includes among other things:

- the qualitative and quantitative recognition of the work carried out;
- the possible finding of non-performance of the services provided for in the contract;
- the findings relating to the completion of the works;
- The route diagram of the executed works.
- 41.1.2 These operations are the subject of a report drawn up on the spot and signed by the Engineer, the Project Manager and countersigned by the contractor.
- 41.1.3 At the end of this pre-acceptance inspection, the Project Manager may specify the reserves to be lifted and the corresponding works to be carried out before the provisional acceptance date that the CONTRACT MANAGER will fix in agreement with the Engineer and the Contractor. Project manager.

#### 41.2- ACCEPTANCE COMMISSION

- 41.2.1 The ACCEPTANCE commission shall consist of the following members:
- 1. The CONTRACTING AUTHORITY or his representative: President;
- 2. The CONTRACT MANAGER, Member;
- 3. The CONTRACT Engineer, Rapporteur;
- 4. The DIVISIONAL Delegate of MINMAP or his representative, Observer.
- 41.2.3 The aforementioned members and the contractor are summoned, by mail from the CONTRACT MANAGER, with a copy to the Representative of the PROJECT OWNER, to take part in the ACCEPTANCE VISIT, at least seven (07) days before the date of the ACCEPTANCE.

The absence of the CONTRACTOR is equivalent to the unreserved acceptance of the conclusions of the commission of receipt.

41.2.4 The Commission, under the direction of the President, after visiting the site, examines the report or the minutes of the operations prior to the reception and pronounces or not the provisional acceptance of the works.

This will be the subject of the minutes of provisional acceptance signed forthwith by all present members of the commission.

- 41.2.5 The provisional acceptance report shall fix the date of completion of the work.
- 41.2.6 In the event that the works cannot be received, notification is made to the contractor, by way of service order signed by the PROJECT OWNER, omissions, imperfections or defects noted that make it impossible to receive. This Service Order gives notice to the contractor to complete the incomplete works or to remedy imperfections and defects in a specified period, without prejudice to the application of the provisions of Article 77 of the GCC.

When the contractor considers that the works are completed, he must again ask the PROJECT MANAGER, provisional acceptance. After the period indicated in the service order, the CONTRACT MANAGER may have another contractor perform, in accordance with the regulations in force, the execution of the necessary works, the damages, costs, risks and perils of the CONTRACTOR.

41.2.7 If the ACCEPTANCE Committee does not meet within fifteen (15) days of the favorable report

prior to receipt, the CONTRACTOR cannot be held responsible for the consequences of this delay on the quality of the work EXECUTED.

41.2.8 At the end and after the acceptance of the works, the CONTRACT MANAGER will deliver to the CONTRACTOR, at his request, the certificate of completion.

#### ARTICLE 42: - DOCUMENTS TO BE PROVIDED

A SITE logbook will be kept by the Contractor and made available to the Project Manager and his representatives.

The CONTRACTOR may record incidents or observations that may give rise to a claim on its part.

The SITE logbook will be signed by both the Project Manager and the Site FOREMAN at each site visit.

For any claims of the CONTRACTOR, only events or documents mentioned in due time may be reported to the SITE logbook.

# ARTICLE 43: - WARRANTY PERIOD AND MAINTENANCE DURING THE GUARANTEE PERIOD

43.1 Guarantee period

The period of guarantee is one year at from the date of provisional acceptance and concern only the hydraulic structures put in place.

43.2 Maintenance during guarantee period on hydraulic structures.

Article 44: Final acceptance

The procedure is the same as that of the provisional acceptance of works, after expiration of the period of guarantee. The acceptance commission will make sure the hydraulic structure continue to function well.

#### Chapter V

#### SUNDRY PROVISIONS

#### **Article 45: Termination of the contract**

The contract may be terminated ipso jure by the Contracting Authority, as provided for in Title V, Chapter I, Section II, Sub-Section I of Decree No. 2018/366 of June 20, 2018 relating to the Public CONTRACT Code and also in the conditions set out in sections 74, 75 and 76 of the TS (Works), including any of the following:

- death of the contractor. In this case, the PROJECT OWNER may, if necessary, authorize the
  acceptance of the proposals submitted by the rights holders for the continuation of the services;
- bankruptcy of the holder of the contract. In this case, the PROJECT OWNER may accept, if applicable, proposals that may be submitted by the creditors for the continuation of the services;
- judicial liquidation, if the co-contractor of the Administration is not authorized by the court to continue the operation of his business;
- in the case of subcontracting, subcontracting or subcommand without prior authorization from the Contracting Authority or the Delegated Contracting Authority;
- failure of the Administration's co-contractor duly noted and notified to the latter by the Contracting Authority to the Delegated Contracting Authority;
- non-compliance with labour legislation or regulations;
- significant variation in prices under the conditions defined by the general administrative clauses, following the modification of the economic conditions or the initial quantities of the contract;
- fraudulent manoeuvres and corruption duly noted.
- The contract may also be terminated in the following cases:
- Delay of more than thirty (30) calendar days in the execution of a service order or unjustified termination of the work of more than seven (07) calendar days;
- - Accumulated penalties exceeding 10% of the T.T.C. amount of works;
- Refusal of resumption of poorly executed work;

- Failure of the contracting partner.

#### Article 46: Case of force majeure

46.1 Cases of force majeure shall be recorded in accordance with the provisions of Section 75 of the GCC.

46.2 It is the responsibility of the Contracting Authority to assess the nature of force majeure and the evidence provided by the CONTRACTOR.

#### Article 47: Disagreements and disputes

Any dispute or dispute arising between the contracting parties shall be the subject of an attempt at a friendly settlement.

In the absence of amicable settlement, any dispute arising from the contract will be brought before the competent Cameroonian jurisdiction, in accordance with the provisions of Article 187 of Decree No. 2018/366 of 20 June 2018 on the PUBLIC CONTRACT CODE.

#### Article 48: Production and dissemination of this contract

48.1 The drafting and formatting of the documents constituting the contract is done by the PROJECT OWNER.

48.2 The edition of this contract, in twenty (20) copies subscribed, is the responsibility of the PROJECT OWNER.

#### Article 49 and last: Entry into force of the contract

This contract shall be final only upon its signature by the Contracting Authority. It shall enter into force as soon as it is notified to the supplier by the Contracting Authority.

The means of compaction that the contractor intends to use must be adapted to the different natures of earth found during earth movements. Works can only begin once the contractor must have brought on the site all the necessary equipment for the execution of task at hand A new layer can only be executed after the preceding layer has been accepted by the project manager after verification of the compactness. This compactness should be at least greater than the agreed minimum from laboratory testing.

The optimum water content for compaction termed OPM is computed in the lab and the in situ material should be brought to the required OPM water content (± 2%) by watering or by drying by scarification

The fill is methodically compacted till obtaining 95% OPM at 30cm beneath the surface. The verification of the compactness is done using a membrane densitometer for each layer of fill. A measure should be done every 1000m<sup>2</sup>.

Drill tests will be realised to determine the number of passages by the compactor to obtain the required compactness.

#### Grading compaction

This task is executed on platforms which are still stable but whose surface present some deformations.

It does not include the creation of gutters and offshoots

This task consists in the elimination of free and non-cohesive materials.

The scarification of the surface to a depth between 10cm and 20cm and eventually up till the bottom of gullies.

After scarification the surface is watered, mixed, graded, and compacted till obtaining the proper drainage profile

The obtained profile is first compacted with a vibrating roller compactor (at least an equipment of Class V2 minimum) for the initial passes and then with a heavy tire compactor (class P2 equipment minimum). The use of mouton compactor is forbidden for this task. Small surfaces which cannot be compacted with the above methods can be compacted using small vibrating cylinders or manual vibrating plates

The equipment used for this task must be approved by the project manager

The compaction will be function of the type of material. The required number of passages for proper compaction will be determined by drill tests on homogenous areas (class PQ2 equipment minimum).

The in-situ density will be measured every 200m and compared to the reference proctor density which will be determined from test samples collected every 5km or at every notable change on the nature of the soil. The compactness will be deemed satisfactory if it reaches 95% of the Modified Proctor density

The transversal grade will be controlled either with a water level, a template form or a level The profile of the platform after construction should not deviate from the template form by more than 2cm

#### Wearing course

The task is executed after the task: construction of the platform The characteristics of the material to be used as wearing course are as follows:

•	Maximum size of grains	$D \max = 31,5 \text{ mm}$
•	Plastic Index	IP < 25
•	% passing thru 10mm	65 à 100
•	% passing thru 5mm	45 à 85
•	passing thru 2mm	30 à 38
•	% of fines	f < 30
•	Max dry density	$\gamma$ d max > 1,8 tonnes.

Every 1000m3 of wearing course, the following test must be done:

- 2 Atterberg limits,
- 2 granulometric analysis,
- 2 Modified proctor test
- 1 CBR test.

All materials which have fail the test must be immediately evacuated from the project site.

The wearing course will be placed on a mean road wideness of 6m and must conform to the prescribes shape profile for the given section and will have a thickness of 15cm measure after compacting.

During the execution, the material used must be brought to the Optimum Modified Proctor water content  $(\pm 2\%)$ . That is by watering of the material is too dry or scarifying and spreading if the material is too wet.

The compaction of the wearing course will be deemed satisfactory if the density measured insitu gives a value at least equal to 95% of the Modified Proctor Density for at least 90% of the tested samples.

Drill tests will be carried out to determine the required number of passes with a roller compactor to obtain these results.

One density measurement will be done every 200m with a membrane densitometer.

The thickness of the wearing course will be measured every 500m. no thickness smaller than the required standard will be tolerated.

All the necessary tests are done at the expense of the contractor. The contractor could use her own equipment or contract the services of an authorized laboratory.

In cases where, for a given road section, 20% of the results fail the test then the works must be redone.

In cases where, for a given section, the measured wearing course thickness is less than 15cm, then the surface must be re-scarified, additional material brought in and compacted up till the required compactness

# Setting-out tolerances

The tolerances for the setting out of the culvert is as follows:

- 5cm for level
- 10cm for plan

Furthermore, the offset between neighbouring elements should not be more than 10mm

# A.4. MATERIALS CONSTITUTING THE CONCRETE

#### A.4.1 Aggregates.

All aggregate sites will be stored in compartments designed to this effect. Only aggregate authorized on the site are the following;

- 0/5 Crushed gravel
- Crushed gravel 5/15
- Crushed gravel 15/25
- Natural sand or crushing /5 (proportion of items retained on the sieve of 5mm must be less than 10%)

#### A.4.2. Gravel

They shall be obtained from a variety of quarries including river deposits, manual or machine crushed, chosen by the Contractor and approved by the Supervisor. They should be clean

(constituents eliminated through settling should be less than 2%) and their grading will be 5 to 15mm and 15 to 25mm suited to various use. If deemed necessary, it shall be washed before use. Gravel particles of less 5mm retained in each of the above grades should not exceed 10% by weight.

Gravel shall be free from dirt, clay or any organic, matter which should be less than 1.5% and if deemed necessary, it should be washed before use as indicated by the supervisor.

#### A.4.4. Sands

Sands will have the characteristics specified in the tables relating to the type-approval tests. Sands will be fine, granular and crunching on hand, not sticking. They will get rid of any part earthy or limestone, of various waste, debris and wood.

The nature and origin of sand remains a subject to the controller's approval. The sand component should be more than 75% and the very fine constituents eliminated by settling should be less than 5%. The sand should pass a standard sieve and must be of high quality and free from dirt, clay or any organic matter and if deemed necessary, it should be washed before use.

- For mortar mixes the recommended standard sieve size is 2 to 2.8mm
- For plaster mortar mixes the recommended standard sieve size is 2mm  $\square$  For mass concrete mixes the recommended standard sieve is 5mm  $\square$  For reinforced concrete mixes the recommended standard sieve is 5mm.

#### A.4.4. Cement.

The cement will be CPA 45 or 45CPJ artificial Portland cements 215.425 standard P.15.402. They will be delivered on site paper bagged six layers. Any wet cement or having been altered by the humidity will be dismissed and removed immediately from the site.

They shall be Ordinary Portland Cement, CPJ 45 manufactured only by CEMENCAM or any other national cement factory, obtained from an approved bulk cement supplier. The bulk supplier must have not kept the cement in stock for more than two weeks. The contractor shall not stock cement on the site for more than three months. The cement must be stacked on 10cm wooden surface in a well ventilated store that is dry and warm, free from moisture. The quality and state of cement shall be verified by the supervising engineer before use. The use of imported cement is strictly prohibited. The contractor will inform the work of the constitution of its supplies.

Conflicting samples will be carried out on each batch and submitted at the expense of the contractor to the tests prescribed by the standard P.15.401 of the AFNOR in a certified laboratory. Lots that do not possess characteristics required will have to be removed from the stock intended for work and evacuated from the site.

BaGTC must be in good condition at the time of their installation on the site and retained areas covered, perfectly dry and an area of isolated boards of ten centimeter ground (10cm) to a minimum.

#### A.4.5. Water.

The water used for construction purpose should be clean and free from any impurities which can affect the quality of the mixed materials. It should therefore be fit for drinking and the mix ratio should range between 0.4 and 0. by weight and context.

#### A.4.6. Steel

All frames or metal mesh implemented in concrete shall conform to the specifications of the 91 BAEL. The steel will have the characteristics of the standard French 45.001 AFNOR. steels used on site will be the grade Fe E24 for mild steel and Fe E40 for high yield steels. The bars will be cut to the shear.

Bending will be cold, either manually or mechanically and diameter or greater than 42mm, provided that it is made use of control device in avoiding overheating and following the opinion of the representative of the control.

Diameter of cores used for bending will be consistent with the BAEL 91 rules and the approval certificates. The provisions of anchorage will be normal elbows  $45^{\circ}$  to return of square or double

anchor elbow. Used steels will be degreased and free of scale. Bars with defects detrimental to their mechanical resistance, such as delamination, crack or chapped skin, will not be accepted. The reinforcements will be shaped to provide exactly the lengths and the forms provided by the drawings of the company.

Assembly of the frames must be on the workshop of the site, but in a form of beam after implementation of the cheeks ever.

Coverings of reinforcement to the shuttering walls will be 2.5cm for concrete in elevation. Coverings of reinforcement to the shuttering walls will be 4cm for foundation concrete. Coverings of reinforcement in concrete forms will be obtained using precast concrete spacers or plastic spacers that dimension will be adapted to the result to get.

The concrete spacers include chevelus of attachment to the frame. Ligatures and mounting bars will be sufficient to avoid any distortion of assembly frame, both during the manipulation at the pouring of concrete.

In case of doubt on the quality of steels supplied on site, the employer or a representative of the contractor or, where applicable, the designated contractor may request, the responsibility of the company, to tests on samples taken on site. The tests will be carried out by an approved body. For reinforcement of floor joists, all provisions will be taken to maintain the bars in the vicinity of support in a good position. Employment in sufficient number of cross-sectional distributions will prevent this possible effect. Recoveries shall conform to the requirements of the 91 BAEL. Reinforcement with no-adherent rust traces will be vigorously brushed before implementation in concrete forms. Shaped or not reinforcement will be stored on some planks and not on the ground. The reinforcements will be supplied in minimum length of 12metres. The reinforcement iron rods to be used will be mild or high yield steel. No use of recycled and rusted reinforcement rods is permissible. **A.4.6.** wood

Wood for formwork: type white wood or equivalent

Wood for scafold: type hard wood, moabi, mouvingui, frake or equivalent.

## A.5. THE CONCRETE.

# A.5.1 Quality of Concrete.

Fifteen (15) days later after the opening of the construction site, and before any execution, the contractor shall submit to the National Laboratory "LABOGENIE" Civil Engineering or any other laboratory authorized by the control for approval, a composition of all concrete and mortars to be implemented, taking account of the materials delivered to the site.

All concrete used in the foundations (lean concrete, mass concrete, stressed and pre-stressed....) will be executed with the CPJ 45 cement. The composition of concrete implementation will be defined by

an analysis of composition of FAURY, VALLETTA, DE DREUX of BOLOMAY methods, carried out by the National Laboratory of Civil Engineering. The contractor shall bear the costs of new composition in laboratory studies. All concrete for reinforced concrete must meet the conditions of required resistance. The requirements are the following. -Characteristic of 28 days compressive strength; 20 bars

-Resistance to traction at 28 days; 22 bars.

In case these values are not obtained, the company will produce a supporting calculation note of security works concerned in accordance with the rules BAEL. 91. Otherwise, it will request the demolition of the concerned works or their strengthening.

# A.5.2 Manufacture of concrete and mortar.

The manufacture of concrete will be conducted by a central concrete to weight determination. Whatever the manufacturing process used, the products obtained shall be homogeneous and perfectly coated aggregates of binders. The duration of mixing to be sufficient to achieve the result intended; once this is achieved, the mixing should not be extended.

The contractor will have any, realize a liquid concrete, given the decrease in resistance caused by excess water. The implementation of dry concrete will be facilitated by the compulsory use of the vibrator.

A sample of concrete taken directly in a waste will have to form a regular ball after quick reciprocating in the palm of the hand and detach easily from the latter without dirt. Testing the cone may be imposed. The water/cement ratio will be determined by the moisture of aggregates.

#### Concrete:

Concrete works shall be of 4 types:

- i. Lean concrete for foundation works where indicated shall be PC  $150 kg/m^4$  and 75 mm thick.
- ii. Mass concrete for floor works; All concrete in floor construction shall be 80 mm/150 mm thick and dosage of PC400kg/m<sup>4</sup>
- iii. Reinforced concrete for works above ground level and not submerged for beams, slabs, lintel, columns and pillar works shall be  $PC450kg/m^4$  with thickness as shown on the construction drawings.

Reinforced concrete for underground and submerged structure works including; beams, slabs and pillar works: All reinforced concrete work dosage in these locations shall be PC400kg/m<sup>4</sup> Underground concrete works shall be mixed with waterproof additives (Super Zaikalite-1kg powder imported) in recommended manufacturer's dosage.

#### Mortar:

Mortar shall be a mixture of 250 (two hundred and fifty) kilogrammes of cement per cubic metre of dry sand.

If the M250 mortar is more than 20 (twenty) millimeters thick, micro-concrete mixed with 400 (three hundred) kilogrammes of cement whose composition shall first of all be submitted for the Supervisor's approval shall be used. (Use mortar mixes for various structural components works as specified in project consulting documents available in the procurement unit of PNDP).

# A.5.4. Implementation of concrete.

Concrete will be implemented as their manufacture; storage in containers requiring an addition of water at the time of employment is strictly prohibited concrete will be always carefully vibrated by cylindrical needles.

Reinforcement nodes will be willing to allow a good implementation of the concrete on the height of the considered work. The company will take all provisions to ensure an altimeter and a correct fixation of the steel to avoid their displacement during casting. Similarly, it will add all bar mounts and ligatures for correct maintenance of the works (sheaths, tubes, pipes, boxes, cleats, preframes. etc) taken by itself or other bodies of state in concrete forms.

The implementation of concrete will be made to the right of the beams and the sails. Before casting of a recovery, the former concrete will be carefully disposed of all gravât the jet of air compressed, transplanted to overhang or project outboard gravels and eliminate milt, then washed if necessary, resumption of concrete additives used according to the sheet fact of the product. No r resumption of concrete will be made in the visible parts of the works.

Stripping of the works will be carried out when the concrete will have acquired sufficient strength.

## A.5.4. Test of Convenience.

It will be executed on the site before the start of the work, a concrete witness to each "workshop" of concrete. Workshop of concrete, consider a set determined position fixed or movable one site to another and which is served by a determined team fixtures. The minimum number of tubes subjected to test is 9.

- The cleaning and the guarding of the project site
- Providing and installation of 02 project sign boards very visible and displayed on positions indicated by the project manager. These site signboards shall be according to the model provided in the annexes.
- Necessary measures for the respect of legal/lawful provisions relating to hygiene and safety on site. (Installation of a latrine, provision of drinkable water, provision of a first aid box equipped with products such as: aspirin, nivaquine, adhesive plaster, bétadine, bands, compress, alcohol...);
- Provisional access roads to the project site;
- A storeroom on site;
- A site office, where the site book, the building plans will be available permanently throughout all realization of works;
- An office or room of at least of 8 m<sup>2</sup> equipped with a table office and two chairs reserved with the Project superintendent;
- A meetings room for the building site which can receive at least 5 people equipped with a table, two benches of 1.5 m, a display board for plans and planning placed permanently. Receptacles to receive waste are to be installed near the various installations. These receptacles are to be emptied periodically and waste to be deposited in a vat for recovery or a dump (pit). This pit must be located at least 150m installations and in the event of presence of river with at least 150m. At the end of work, the pit is to be filled with ground up to the level of the original ground.

#### 1 Preparatory works

#### 1/1 Bush cleaing

The site shall be cleared of all grass to a height of not more than 5cm.

#### 1/2 Debris/Cleaning of water run way.

The section to receive the structure and its surroundings shall be cleaned and free from all debris, mud, excess soil and others for easy flow of water through the bridge.

#### 1 /4 Installation of the work site.

The installation of the site shall be done on a section agreed between the contractor and the Control Engineer together with the areas for stockpiling materials. The site shall be fenced with local materials and signboard mounted by the contractor. Access to the site shall be prohibited to the public. The contractor shall be responsible for the total security of the site.

#### 1/4 Implantation

The contractor shall indicate the implantation of the structure according to the plans. This implantation shall be done in accordance with the Control Engineer. The contractor shall be responsible for errors of levels and alignments that were not signalled earlier.

#### 1 /5 Excavation

All trenches for foundation footings shall be excavated according to the plans. The foundation trenches shall be sunk to the good soil as indicated by soil studies and agreed by the Control Engineer. The trenches shall be shaped accordingly.

#### 1/6 Backfilling

All backfilling, where necessary shall be done with well-drained lateritic soil and compacted in layers of 20 cm successively.

#### 2/ Foundation

#### 2/1 Blinding Concrete

A blinding concrete of 5 cm thick and a concrete mix of 150 kg of cement (CPA 425) per m4 shall be cast at the base of the hardcore.

#### 2/4 Reinforced Concrete foundation footings

The foundation footings shall be cast with R.C. of 450 kg of cement (CPA425) per m4.

# Document No. 6: UNIT PRICE SCHEDULE

TM119	Bulldozing TM119 prices remunerates under the general conditions provided for in the contract per kilometer (km), the opening, with a Bulldozer, of existing and none existing road of a width of at least six metres (6m) The kilometre at:	km	
	SERIE 300 : DRAINAGE		
TM301	Cleaning of culverts ( $\emptyset \le 1.5m$ ) and scuppers ( $H \le 1.5m$ ) This price remunerates under the general conditions provided for in the market, per UNIT (U), the cleaning of culverts ( $\emptyset \le 1.5m$ ) and scuppers ( $H \le 1.5m$ ). This price includes in particular: manual dredging and cleaning of the structure and the upstream and downstream beds over a minimum distance of 5 meters in order to restore the flow of water; storage of cleaning and cleaning products in a place approved by the Project Manager; verification of the longitudinal slope of ditches and outlets compatible with complete discharge of water; all constraints related to compliance with environmental requirements; and all other subjections. Unit at:	U	
TM302	Cleaning of culverts (Ø>1.5m)  This price remunerates under the general conditions provided for in the market, per UNIT (U), the cleaning of nozzles (Ø>1.5m).  This price includes in particular:  • clearing and cleaning of the culvert and the upstream and downstream beds over a minimum distance of 5 meters in order to restore the flow of water;  • storage of cleaning and cleaning products in a place approved by the Project Manager;  • all constraints related to compliance with environmental requirements;  • and all other subjections.  The Unit at:	U	
ГМ303	Opening River bed  This price remunerates under the general conditions provided for in the market, per SQUARE METER (m2), the manual clearing of the river bed which consists of cleaning and restoring the beds of the rivers in order to ensure a better flow of water.  This price includes in particular:  • weeding, deforestation, removal of any obstacle preventing the proper flow of water, their transport and their deposit in a place approved by the Project Manager regardless of the distance;  • all constraints related to compliance with environmental requirements;  • and all other subjections.  The Square Meter at:	M²	
M307	regardless of the distance;  • assembly and placement of nozzles;  • application of the anti-corrosion coating;  • the realization of the technical block (supply of material and implementation) up to $\emptyset/2 + 10$ cm at least, ( $\emptyset$ being the diameter of the nozzle), above the upper generatrix of the nozzle;  • all installation constraints (exhausting, pumping, shoring) and taking into account the differential settlements of the structure;  • any cleaning of the openings upstream and downstream of the nozzles in order to ensure perfect flow;	ml	
	• all constraints related to traffic conditions and compliance with environmental requirements;	1	1

<ul> <li>The connection of the technical block to the existing roadway with slopes of less than 4%;</li> <li>and all other subjections.</li> <li>The linear meter at:</li> </ul>	
Culvert head The TM310 prices remunerate under the general conditions provided for in the market, per UNIT (U), the construction of nozzle heads in masonry or reinforced concrete. These prices include: For masonry nozzle heads: • the supply and transport on site of all the materials (rubble stone, cement, sand, gravel, etc.) and equipment necessary for the execution of the masonry, • setting up and staking out the structure, • the execution of the excavations, whatever the nature of the ground, the transport and the deposit of the products of excavations in a place indicated by the Project Manager, whatever the distance, • the manufacture of the mortar dosed with 400 kg of cement per cubic meter and the careful implementation of the masonry including wedging, adjustment, moistening of the rubble, shaping of the joints by repointing, • backfilling, compacting, restoration of the surroundings, • all constraints related to traffic conditions and compliance with environmental requirements, • And all other subjections. For reinforced concrete nozzle heads: • the supply and transport to the site of all the materials and equipment necessary for the manufacture of concrete and its implementation, • setting up and staking out the structure, • the execution of the excavations, whatever the nature of the ground, the transport and the deposit of the products of excavations in a place indicated by the Project Manager, whatever the distance, • the formwork and reinforcement of the structure, • formulation and manufacture of concrete according to technical requirements, • the implementation of concrete, vibration, treatment and possible adjustment of surfaces, • stripping, painting buried surfaces with bitumen, backfilling, compacting, restoring the surroundings, • all constraints related to traffic conditions and compliance with environmental requirements, • and all other subjections.  The unit at:	
Project Launching and sensitization	

TM003	Project Launching and sensitization  This item remunerates in the general conditions of this contract at a lump sum price (LS). The aim of this item is to involve the local population and other stakeholders in the project. Considering the sociopolitical climate this item could help facilitate the execution of the project.  This price includes:  At least two gathering of the project stakeholders with the beneficiaries of the project where information on the project could be exchanged;  At least two representatives of the local population;	LS	
	<ul> <li>Sensitization of the gathering on the project, governance etc</li> <li>Food and drinks;</li> <li>Any other relevant facilitation</li> </ul> The lump sum at:		
	SERIES 100 : CLEARING AND EARTH WORKS		
	This price compensates in the general conditions provided for in the contract, at a SQUARE METER (m2), the brushcutting which consists of cleaning the ground and cutting all the woody plants, and the shrubs inside the off-platform right-of-way. This task is normally performed manually; it may be mechanically, at the request of the Project Manager, in areas of low population density or in the event of particular difficulties.		
	This price includes:  • clearing, grubbing up of grasses, brush, plantations inside the off-platform right-of-way;  • the felling and cutting of trees whose diameter is less than or equal to 20 cm;  • pruning of trees outside the right-of-way;  • the collection, removal, transport and evacuation of cutting products and their storage outside the right-of-way in a place approved by the Project Manager;  • removal of cleaning products from ditches, loading, transport whatever the distance, unloading and provisional or final storage in a place approved by the Project Manager;  • all possible compensation for residents;	M²	
	<ul> <li>any restrictions linked to compliance with environmental regulations;</li> <li>and all other subjects.</li> </ul>		

TM102			
TM103	Tree felling		
	This price compensates in the general conditions provided for in the contract, at UNITE (U), the felling of single trees.	:	
	This price includes:		
	<ul> <li>the cutting of any tree with a diameter greater than fifty (&gt; 50) cm;</li> <li>the cutting of the trunks, the evacuation of all the products resulting from the cutting in a place</li> </ul>		
	Transfer indirect manager.	U	
	• all possible compensation for residents;		
	<ul> <li>any restrictions linked to compliance with environmental regulations;</li> <li>and all other suggestions.</li> </ul>		
	The Unit at:		
TM108	Backfill from borrow pits		
	The TM108 prices remunerate in the general conditions provided for in the contract, per CUBIC METER (m3), the backfull with materials (to be defined)		
	These prices include:		
	• the preparation of borrow places, the opening and maintenance of second at the control of the preparation of borrow places, the opening and maintenance of second at the control of the preparation of borrow places, the opening and maintenance of second at the control of the preparation of the pre		
	within the scope of the operation;  • any costs of expropriation or compensation;

	, ,		
	<ul> <li>the extraction of materials, their storage or recovery from possible stocks;</li> <li>transport of materials on the job over a distance not exceeding 5000 meters;</li> <li>spreading of materials in lower and distance not exceeding 5000 meters;</li> </ul>	M3	
	oprouding of materials ill layers compatible with the compacting magnet		
	• restoration of borrow places:		
	any restrictions linked to compliance with environmental regulations.		
	• and all other sugestions.  THE CUBIC METRE AT		
ГМ108а	Backfill in "lateritic gravels" from borrow pits		
	This price compensates in the general conditions provided for in the contract, at the CUBIC		
	METER (m3), the purges.  This price includes:		
	• extraction of poorly maintained materials:		
	• loading, transport whatever the distance and unloading at the drop-off locations approved by the Project Manager;		
	• backfilling the excavation with horrowing materials of good shows it.		
	TM108, for the reconstruction of the initial level of the platform by compacting in layers of 20 cm		
	any restrictions linked to traffic conditions and compliance with environmental regulations;     and all other subjects.	M3	
	and the sudjects.		
	NB: This price applies to quantities less than or equal to 100 m3 per drain point; beyond this, the cut and fill prices will be taken into account.		
	The Cubic Meter at:		
	SERIE 300 : DRAINAGE		
M304	Cleaning of the river bed		
M314	Riprap		
	This price compensates in the general conditions provided for in the contract, per METER CUBE (m3), the supply and installation of riprap.		
	This price includes:		
	• the supply and transportation on the job of rock blocks of a unit weight defined by the Contracting Authority, regardless of the distance;		
	• excavations necessary for the placement of rock-fill.	М3	
	• the installation and adjustment of the blocks in order to ensure the stability and sustainability of the structure;		
	any restrictions linked to traffic conditions and compliance with environmental regulations;     and all other sugestions.		
	The Cubic Meter at:		

TM315	Weepholes (barbican)		
	This price compensates in the general conditions provided for in the contract, at UNIT (U), the supply and installation of barbican in PVC pipe (Diameter to be defined by the Contracting Authority) for drainage of the materials located behind the abutments, retaining walls, or masonry.  This price includes:  • supply and transport on the job of PVC pipes;  • the implementation of the Barbarians;  • And all subject to execution.	U	
	The Unit at:		
	SERIE 400 : ENGINEERING STRUCTURES		
TM407	Excavations in ordinary terrain or in a river bed		
	This price compensates in the general conditions provided for in the Contracts, per METER CUBE (m3), the execution of excavations for foundations in soft ground (not requiring the use of rock breaker, compressor or explosives) or in bed of river.  This price includes:  • excavation and extraction of materials from soft ground;  • shoring, shielding, protection and possible supports;  • any cofferdams and temporary embankments;  • depletion, pumping for the dry execution of works;  • the preparation of the excavation bottom and its compaction;  • loading of extraction materials, transport whatever the distance, unloading at the place of reuse or final deposit approved by the Project Manager;  • any restrictions linked to environmental regulations;  • and all other subjects.  The Cubic Meter at:	M3	
ГМ409	Abutment in stone masonry		
	The TM409 prices compensate under the general conditions provided for in the contract, at UNIT (U), the construction of abutments in stone masonry according to the approved execution plans and in accordance with the instructions of the Project Manager. These prices include:  • the establishment of structures; • the possible deviation of the watercourse; • possible deviation from the route; • earthworks and drying up of excavations; • the construction of masonry foundations, after removal of existing and unnecessary foundations, logs or buried materials of any kind; • the supply and transportation on the job of all materials and equipment necessary for the construction of masonry abutments; • the manufacture of the mortar at the prescribed dosage and the careful implementation of the masonry including the setting, adjustment, moistening of the rubble; • shaping of joints by repointing; • any restrictions linked to traffic conditions and compliance with environmental regulations; • and all other sugestions.		
M409d	Abutment in stone masonry 5m <h≤ 6m="" at:<="" td="" the="" unit=""><td></td><td></td></h≤>		
		U	
M412	Filtring materials behind the abutments  This price compensates in the general conditions provided for in the contractt, per METER CUBE (m3), the supply and implementation of the filtering materials behind the abutments. These materials will be approved by the Project Manager. The draining masks will consist of a stack of materials with a thickness of fifty centimeters (50 cm); they will be placed over the entire width of the abutment.  This price includes:  on-site supply, including transport regardless of the distance,  the implementation of filtering materials including all working constraints in narrow widths;  any restrictions linked to compliance with environmental regulations;  and all other sugestions.  The cubic meter at:	M3	

	The TM430 prices remunerate under the general conditions provided for in the market, per LINEAR METER (ml), the replacement of heavily corroded IPE metal beams (nearly 50%), deformed or broken.  These prices include in particular:  • the removal of defective IPE beams, any demolitions, transport whatever the distance and thei deposit at the place indicated by the Client;  • the supply and transport to the site of the new IPE beams, the supply and installation of the devices for fixing the beams to the header in accordance with the technical requirements as well as the supply of adequate assembly equipment;  • the installation of new IPE beams on the supports in accordance with the technical requirement including their protection against rust and all constraints,  • all constraints of wedging, adjustment, implementation of concrete to seal the connection of the elements, the supply and welding of the metal spacers,  • all constraints related to traffic conditions and compliance with environmental requirements;  • and all other subjections.  The linear meter at:  Formwork  The TM431 prices remunerate under the general conditions provided for in the market, per SQUARE METER (m2), the supply and installation of ordinary or neat formwork. This operation consists of forming the various surfaces when necessary before a series.	ts,	
TM431c	of robust construction because it is called upon to support, as the case may be, the thrust of the fresh concrete or the weight of the construction until the debending of the structure.  • the supply on site and the implementation of the props, hangers, scaffolding, temporary supports maintenance:		
	<ul> <li>preparation, construction, maintenance of any excavations and temporary backfill, for arches, temporary props and removal of backfill at the end of the work;</li> <li>the supply and installation of any elements intended to emphasize the architectural aspect (case of neat formwork);</li> <li>the supply and implementation of formwork removal products, formwork removal (except permanent formwork), dismantling of props, hangers, scaffolding;</li> <li>all constraints related to traffic conditions and compliance with environmental requirements;</li> <li>The square metre at:</li> </ul>		
TM432	Scaffolding This price compensates in the general conditions provided for in the contract, the PACKAGE / STRUCTURE (FT / OU), the supply and installation of scaffolding for the entire structure. This task consists of the supply and use of an adequate means used to repair the undersides of the decks, the beams and the upper parts of the abutments or piers. This price includes:  • the supply, installation, stalling and adjustments, dismantling and folding of the scaffolding; • any restrictions linked to traffic conditions and compliance with environmental regulations; The Lump sum at:	LS	
°M438	Drainage pipes  This price compensates in the general conditions provided for in the contract, at UNITE (U), the supply and installation of drainage pipes in Ø100 PVC pipe for the evacuation of water from the deck.  This price includes:  • the supply and transportation to the work site of all the planned items;  • laying and fixing of Ø100 PVC pipes;  • the implementation of gargoyles;  • any restrictions linked to traffic conditions and compliance with environmental regulations;  • and all other sugestions.  The unit at:	U	
M441	Geotechnical and execution studies  This price compensates in the general conditions provided for in the contract, the PACKAGE (FT), the geotechnical and technical studies:  This price includes:  Geotechnical studies to be carried out on the right of the structure to be built, to determine the depth of scour and in particular the following reconnaissance: pressuremeter or light penetrometer drilling, concrete formulation, laboratory tests (particle size analyzes, water content, etc.).  Hydraulic and hydrological studies;  Technical execution studies, among others: calculation notes, execution plans, etc.  NB: This price is paid after validation of the report.		

	Indicator signs		
TM531	This price compensates in the general conditions provided for in the contract, per unit, the supply and installation of the signboards.  The Unit at:	U	
TM606	Paintings on the structure elements		
1111000	The TM606 prices remunerate under the general conditions provided for in the contract, per SQUARE METER (m2), applying paint to the works.		
	These prices include:		
	• preparing the surfaces to be painted.		
	• the supply and transportation on the job of all the necessary materials and equipment;		
	<ul> <li>any restrictions linked to traffic conditions and compliance with environmental regulations;</li> <li>and all other sugestions.</li> </ul>		
TM606a	Anticorrosive paint		
	The Square Meter at:	m²	
TM606b	Oil painting	111	
	The Square Meter at:	2	
TM606c	Bituminous Paint	m²	
TWIOOCC	The gaven	M²	

# Document No. 7: BILL OF QUANTITIES AND COST ESTIMATES

# BILL OF QUANTITIES AND COST ESTIMATE FOR CONSTRUCTION/RECONSTRUCTION OF A COLLAPSED STRUCTURE IN MOMO DIVISION. (CONSTRUCTION OF MAIN BRIDGE IN ANDEK TOWN FEG
