26.2 Any attempt by a bidder to influence the Evaluation sub-committee of bids or the Contracting Authority in his award decision may cause the rejection of his offer.

26.3 Notwithstanding the provisions of paragraph 26.2, between the opening of bids and the award of the contract, if a bidder wishes to enter into contact with the Contracting Authority with reasons having to do with his offer may do so in writing.

### **Article 27: Clarifications on the offers and contact with the Contracting Authority**

27.1 To ease the examination, evaluation and comparison of offers, the chairperson of the Tenders Board may, if he desires, request any bidder to give clarifications on his offer. This request for clarification and the response given are formulated in writing but no change on the amount or content of the offer is sought, offered or authorised, except it is necessary to confirm the correction of calculation errors discovered by the Evaluation Sub-committee during the evaluation in accordance with the provisions of article 29 of the General Regulations.

27.2 Subject to the provisions of paragraph 1 above, bidders shall not contact members of the Tenders Board and the Evaluation Sub-committee for questions related to their offers, between the opening of envelopes and the award of the contract.

### **Article 28: Determination of Conformity of offers**

28.1 The Evaluation sub-committee shall carry out a detailed examination of offers to determine if they are complete, if the required guarantees are furnished, if the documents were correctly signed and if generally the offers are in proper order.

28.2 The Evaluation sub-committee shall determine if the offer is essentially in conformity with the conditions fixed in the Tender File based on the content without recourse to external elements of proof.

28.3 An offer that conforms to the Tender File shall essentially be an offer that respects all the terms, conditions and specifications of the Tender File, without substantial divergence or reservation. A substantial divergence or reservation is that:

- i) which substantially limits the scope, quality or realisation of the works;
- ii) which substantially limits and is not in conformity with the Tender File, the rights of the Contracting Authority or the obligations of the bidder in relation to the contract;
- or
- iii) Whose correction would unjustly affect the competitiveness of the other bidders who presented offers that essentially conformed with the Tender File.

28.4 If an offer is essentially not in conformity it shall be rejected by the competent Tenders Board and shall not eventually be rendered in conformity.

28.5 The Contracting Authority reserves the right to accept or reject any modification, divergence or reservation. Modifications, divergences, variants and other factors which are beyond the requirements of the Tender File shall not be considered during the evaluation of offers.

### **Article 29: Qualification of the bidder**

The Evaluation sub-committee shall ensure that the successful bidder, who has an offer substantially in conformity with the provisions of the Tender File, fulfils the qualification criteria stipulated in article 6 of the Special Regulations. It is essential to avoid any arbitrariness in determining qualification.

### **Article 30: Correction of errors**

30.1 The Evaluation sub-committee shall verify offers considered essentially in conformity with the Tender File to correct the possible calculation errors. The Evaluation sub-committee shall correct the errors in the following manner:

- (a) where there is an incoherence between the unit price and the total obtained by multiplying the unit price by the quantity, the unit price being authentic, the total price shall be corrected, unless the Evaluation sub-committee judges that it is a gross error of

decimal point in the unit price in which case the total price as presented shall be authentic and the unit price corrected.

- (b) if the total obtained by addition or subtraction of the totals is not exact, the sub totals shall be considered authentic and the total corrected.
- (c) Where there is a difference between the price indicated in letters and in figures, the amount in letters shall be considered authentic, unless the amount is linked to an arithmetical error confirmed by the sub-detail of the said price, in which case the amount in figures shall prevail subject to paragraphs (a) and (b) above.

30.2 The amount featuring in the offer shall be corrected by the Evaluation sub-committee, in accordance with the error correction procedure above and with confirmation by the bidder, the said amount shall be deemed to commit him.

30.3 If the bidder who presented the lowest bid refuses the correction thus carried out, his offer shall be rejected and the bid bond may be seized.

### **Article 31: Conversion into a single currency**

31.1 To facilitate the evaluation and comparison of offers, the Evaluation sub-committee shall convert the prices of offers expressed in various currencies into those in which the offer is payable in CFA francs.

31.2 The conversion shall be done using the selling rate fixed by the Bank of Central African States (BEAC) under the conditions defined by the Special Regulations.

### **Article 32: Evaluation of financial offers**

32.1 Only offers considered as being in conformity, as per the provisions of article 28 of the General Regulations, shall be evaluated and compared by the Evaluation sub-committee.

32.2 By evaluating the offers, the Evaluation Sub-committee shall determine for each offer the evaluated amount of the offer by rectifying the amount as follows:

- a) By correcting any possible error in accordance with the provisions of article 30.2 of the General Regulations;
- b) By excluding projected sums and where necessary provisions for the unforeseen occurrences featuring in the bill of quantities and estimates but by adding the amount of works done under State supervision where they are costed in a competitive manner as specified in the Special Regulations.
- c) By converting into a single currency the amount resulting from the rectifications (a) and (b) above, in accordance with the provisions of article 31(2) of the General Regulations;
- d) By appropriately adjusting any other modification, divergence or quantifiable reservation on technical or financial basis.
- e) By taking into consideration the various execution time-limits proposed by the bidders, if they are authorised by the Special Regulations;
- f) If need be, in accordance with the provisions of article 13(2) of the General Regulations and the Special Regulations by applying the rebates offered by the bidder for the award of more than one lot, if this invitation to tender is launched simultaneously for several lots.
- g) If need be, in accordance with the provisions of the Special Regulations and the Technical Specifications, the proposed technical variants, if they are permitted, shall be evaluated according to their own merit and independently of the fact that the bidder offered or not a price for the technical solution specified by the Contracting Authority in the Special Regulations.

32.3 The estimated effect of price revision formulae featuring in the GAC and SAC applied during the period of execution of the contract shall not be considered during the evaluation of offers.

The Contracting Authority reserves the right to accept or reject any modification, difference or reservation. The modifications, differences, variants or other factors which exceed the requirements of the tender file are not taken into account during the evaluation of offers.

32.4 If the offer judged the lowest bid is considered abnormally low or strongly unbalanced in relation to the estimates of the Contracting Authority, the Evaluation sub-committee may, from the sub-details of prices furnished by the bidder for any element or all the elements of the bill of quantities and estimates, verify if these prices are compatible with the construction methods and proposed calendar. In the case where the justifications presented by the bidder are not satisfactory to it, the Contracting Authority may reject the offer.

### **Article 33: Preference granted national bidders**

If this provision is mentioned in the Special Regulations, national contractors may benefit from a margin of national preference during the evaluation of offers as provided for in the Public Contracts Code.

## **F. AWARD OF THE CONTRACT**

### **Article 34: Award**

34.2 If, according to article 13(2) of the General Regulations, the invitation to tender comprises several lots, the lowest offer shall be determined by evaluating this contract with other lots to be awarded concurrently, by taking into account the rebates offered by the bidders in the case of more than one lot, as well as their financial situation at the time of award.

### **Article 35: The right by the Contracting Authority to declare an invitation to tender unsuccessful or cancel a procedure**

The Contracting Authority reserves the right to cancel a procedure of invitation to tender after the authorisation of the Prime Minister where the offers have been opened or to declare an invitation to tender unsuccessful after the advice of the competent Tenders Board, without any claims being entertained.

### **Article 36: Notification of the award of the contract**

This letter will indicate the amount the Contracting Authority will pay the contractor to execute the works and the execution time-limit.

### **Article 37: Publication of results of award and petitions**

37.1 The Contracting Authority shall communicate to any bidder or administration concerned, upon request addressed to it within a maximum deadline of five (5) days after publication of the award results, the Independent Observer's report as well as the minutes of the award session of the related contract to which shall be attached the evaluation report of the offers.

37.2 The Contracting Authority is bound to communicate the reasons for the rejection of offers of the bidders concerned who so request.

37.3 After publication of the award results, offers that are not withdrawn within fifteen (15) days shall be destroyed, without any claims for compensation being entertained. Only the copy destined for the body in charge of regulation shall be kept.

## Description

### **SOLAR POWERED LIGHT**

Solar powered street lights are a type of outdoor lighting system that uses solar panels to convert sun light into electricity, which is then stored in batteries and used to power LED lamps at night. Solar powered street lights are energy-efficient, environmentally friendly, and cost-effective, as they do not require grid connection, trenching, or wiring.

It should light colour rendering index and make the object's light colour closer to real. The solar light should be IP65 certified for waterproof.

The solar light should be made with material to withstand high temperature, dust, rust, corrosion and wind. It should be anti-aging and long serving.

The solar light should have high quality Mono crystalline panels to ensure fast charging times.

The solar lights should be equipped with large capacity safety battery to ensure fast sustainable lighting when fully charged (12 hours minimum).

The controller unit should automatically turn off the light during the day and light up at night time.

Solar street lights should be easy to install. They are equipped with screws to be mounted on a pole and no wire necessary.

Solar street lights should be maintenance free to work automatically. It should have a wider illumination angle for road lighting

### **SOLAR STREET LIGHT MINIMUM SPECIFICATION**

**Parameters: 400-500w light power**

- Isolates outdoor humidity and dust, prolonged lifetime
- IP 65 waterproof and IK08 wind resistance
- The panel should be placed at an angle of 30° to 40° facing south

## **LIGHT POLE:**

Galvanized steel poles are a common choice for solar-powered street lights, as they offer durability, corrosion resistance, and low maintenance. Galvanized steel poles are coated with a layer of zinc that protects them from rust and weathering. They can also withstand strong winds and impacts, making them suitable for various installation and climate conditions.
